NI LabVIEW Base Development System for Windows

- Fully integrated graphical system design software
- Support for a wide range of measurement hardware, I/O, and buses
- Custom, event-driven user interfaces for measurement and control
- Advanced compiler to ensure high-performance execution and code optimization
- Includes self-paced online training to enhance your proficiency

Overview

NI LabVIEW is an award-winning development environment optimized for engineers and scientists creating test, measurement, and control applications. With LabVIEW, you can quickly and easily acquire real-world signals, perform analysis to ascertain meaningful data, and communicate or store results in a variety of ways.

You can obtain LabVIEW along with application-focused add-on software at discounted prices by purchasing NI Developer Suite. If you have an earlier version of LabVIEW, you can purchase an upgrade using the NI Software Upgrade Advisor.

The LabVIEW Base Development System includes one year of membership in the Standard Service Program (SSP) to help you make the most of your software investment. With an SSP membership, you can capitalize on the latest technology improvements through automatic software updates and maintenance releases and reduce your application development time with direct access to technical support from NI applications engineers via phone and email. You also have access to special online, on-demand software training modules to learn more about features, application uses, and development best practices.
